Faculty of Nursing, Srinakharinwirot University Practice Evaluation Guidelines (NS 203)

No.	Topics for assessment	Behavior / Information used for assessment		
Part 1: Nursing practice				
1	Collecting comprehensive and complete	1.1 Collecting data from observation and interviews		
	data according to reality	correctly.		
		1.2 Collecting data from physical examination correctly		
		1.3 Collecting data from laboratory tests correctly.		

No.	Topics for assessment	Behavior / Information used for assessment
		1.4 The data gathered covering physical, psychosocial and
		spiritual aspects
2	Nursing diagnosis covering physical,	2.1 Analyzing data and linking the relationship of data
	psychosocial and spiritual aspects	correctly
		2.2 Interpreting data correctly
		2.3 Identifying the support information for each nursing
		diagnosis correctly.
		2.4 Setting the messages covering physical, psychosocial
		and spiritual aspects
3	Correct and proper nursing planning	3.1 Prioritizing problems correctly
		3.2 Defining nursing goals in each problem correctly
		3.3 Determining the evaluation criteria for each problem
		correctly
		3.4 Determining and prioritizing nursing activities
		correctly, covering care, disease prevention, health
		restoration and health promotion
4	Performing each nursing activity with	4.1 Preparing service recipients and equipment and
	quality and efficiency	environment suitable for the activities
		4.2 Correctly performing nursing activities according to
		techniques and procedures
		4.3 Spending appropriate time for each activity
		4.4 Following up the results of nursing activities
5	Having quality and efficient	5.1 Using communication skills to collect data of the
	communication skills	service recipients correctly.
		5.2 Using communication skills for proper nursing
		diagnosis
		5.3 Using communication skills in performing nursing
		activities properly
		5.4 Using communication skills in recording nursing
6	Applying knowledge to nursing practice	evaluation correctly and appropriately 6.1 Having correct knowledge about diseases, causes,
0	Applying knowledge to hursing practice	symptoms and signs of diseases
		6.2 Having correct knowledge about treatment and
		nursing
		6.3 Providing reasons for patient care activities correctly
		6.4 Teaching each patients correctly and appropriately
7	Self-protecting from danger in nursing	7.1 Always taking care of health
·	practice	7.2 Strictly following the principles of infection control
	·	from health services.
		7.3 Performing nursing practice by adhering to the
		principles of prevention of infection
		7.4 Self-protecting from harm and injury from the use of
		materials in nursing practice

No.	Topics for assessment	Behavior / Information used for assessment
8	Evaluating nursing practice	8.1 Summarizing and judging of the results of the nursing
	comprehensively, completely and	practice correctly according to the assessment criteria
	accurately	8.2 Evaluating nursing practice consistent with the nursing
		goals
